

## **Counsell Lake property**

This property is located 20 kilometres southwest of Lynn Lake where the Hudson Bay rail line runs through the property. The property consists of 16 claims (2,586 hectares). Twenty drill holes into the property have outlined four poorly defined mineralized zones.

### **Counsell Highlights**

- **Boiley Lake zone**

**Intersected** 3.6 per cent copper and one gram per tonne gold over three metres (2.9-metre true width);

**Intersected** 3.4 per cent copper and 1.1 grams per tonne gold over 2.1 metres (1.8-metre true width)

**Intersected** 3.3 per cent copper and two grams per tonne gold over 1.8 metres (1.8-metre true width)

**Downhole pulse data** suggest a two-to-three-times-stronger conductive body at depth which is undrilled.

- **Sell 6 zone**

The best intersection was 0.8 per cent copper over 3.6 metres (2.6-metre true width).

- **Counsel Lake zone**

The best intersection was 3.7 per cent copper and 0.8 gram per tonne gold over five metres (2.9-metre true width).

- **Sell 12 zone**

The best intersection was 1.1 per cent copper over 5.9 metres (4.2-metre true width).
