Job Title: Drill/Field Project Geologist

Number of Vacancies: 1

Location: Flin Flon, Manitoba

Copper Reef: Copper Reef Mining Corporation (CZC-CNSX) has a large property base (32 properties) in the prolific Flin Flon –Snow Lake Greenstone Belt of Manitoba and the Hanson Lake Area of Saskatchewan. Currently the Company has a number of active projects including: drilling off the Alberts Lake gold deposit; a base metal project in Saskatchewan, and a base metal property immediately north of the Flin Flon Smelter which we are also currently drilling. We are well financed. A competitive salary will be negotiated

Job Description: We are looking for a project geologist(full time)

- To manage drill programs, log core, sample, and general logistics; budgets, geochemical data analysis, interpretation and write associated reports on work completed.
- Direct and instruct support staff and contractors on matters related to the assigned project.
- Complete compilations, summary report, budgets, and presentations on many of our inactive projects with the view of new target development.
- Geological mapping, lithochemical sampling and prospecting.
- Managing Joint Venture projects.
- Report to either to VP of exploration or M'Ore senior geologist.

The Ideal Candidate should Posses:

- A degree in Geology (BSc.), and is a P.Ge., or GIT
- A minimum of 2 years of direct exploration experience in Precambrian rocks. Salary will be based on qualifications and experience.
- Experience logging core
- Willingness to spend time in the field. Note most of active projects are within daily driving distance.
- Strong communication and written skills
- Good computer skills
- Valid driver's licence
- Well organized and enthusiastic a must

Note: Please include a cover letter, detailed resume, and letters of reference to Stephen Masson more@mts.net and above phone/fax numbers.
